

Airease

THE MOST WONDERFUL AUTOMOBILE INVENTION OF THE AGE

Scientists and motorists are looking with amazement at the invention that is to revolutionize automobile traction.

It has taken us three years to convince ourselves that Airease unquestionably contains the characteristics that are necessary for a perfect tire filler—a perfect tire filler must be soft and spongy, at the same time so resilient that it will always return to its original position—it must be a substance that will not be affected by heat or cold, that cannot disintegrate under constant fluctuations of pressure, and that cannot shrink, compress, or harden through years of automobile tire service. This seemed an inventor's dream.

Airease was discovered three years ago by a very famous chemist, and while other so-called inventors of tire fillers were ruthlessly pillaging the motor industry with attempts at tire fillers, the backers of Airease were testing, trying and proving on hundreds of cars over thousands of miles.

The men behind Airease are all men of large financial means and nationally recognized business integrity. Airease is no "fly-by-night" or "get-rich-

quick" scheme, nor is it any attempt to compete with the substances heretofore known as tire fillers.

Airease is so marvelous an invention and gives such great utility, economy and comfort that it should be known to every motorist. We therefore inaugurate the biggest advertising campaign ever used for plain educational purposes, and we do it with the intention of relieving a million motorists of the discomfort of pneumatic tires.

If you are not entirely satisfied with the resiliency of Airease, or if you are dissatisfied with it for any reason whatsoever, we will not only return the full purchase price, but we will present you with a new set of inner tubes.

The Business Possibilities of Introducing Airease to the Motorists of Your District Cannot Be Overestimated. Just Name the Territory and We Will Show You in Figures What Airease Means to You.

It's a satisfaction to do business with a big, sound organization of unlimited financial means that is marketing a product of unquestioned value.

But can you conceive of a greater opportunity than that offered by the much needed Airease? There are a million automobiles in the United States and almost all of them are supported on troublesome pneumatic tires. Those who have seen the marvelous achievements of Airease in the past three years—and there are thousands of cars now running on Airease—freely prophesy that within the next two years 50 per cent of all the pleasure and commercial cars in the country will be supplied with Airease.

For indeed Airease is a marvelous substance. Samples of it have been exposed to the air for two years, through summer heat and winter cold, and yet the slightest change in its condition, in its bulk, or in its resiliency cannot be detected. In actual use in tires Airease shows like results.

Casing after casing has been worn out over one inner tube filled with Airease and not the slightest change has taken place within the inner tube. Those who have used pneumatic tires ever since the early days of the automobile cannot detect the slightest difference between riding on Airease and riding on compressed air.

Automobiles have stood for many months on tires filled with Airease, and when the wheels were turned not the slightest flattening of the Airease tube could be detected. In fact, Airease will always return to its original size and shape.

If you are interested in making money in the automobile business, there never was a finer chance. The motorists in your neighborhood are right now reading our big advertising campaign, and before it is finished every motorist in America will be thoroughly familiar with Airease.

We are now placing filling stations in all parts of the country, and we will be glad to explain to you what one will cost in your territory. We are receiving inquiries now from everywhere, and we hope that you will be successful in getting your territory.

AIREASE TIRE FILLER COMPANY

Cor. 14th and Pennsylvania Ave., Washington, D. C.

The day when a little glue, glycerine, water, chalk, etc., could be concocted by a charlatan and sold for tire filler has passed—thanks to the science of Airease.

THE LIFE-BLOOD OF OTHER TIRE FILLERS

THE HIDDEN SECRET OF AIREASE

THE CHEMIST'S TUBE

AIREASE

It is absolutely guaranteed to contain

NO GLUE
GELATINE
ACID
WATER
GLYCERINE
OR ANYTHING INJURIOUS TO RUBBER
OR THAT MIGHT EVAPORATE

AIREASE
It is guaranteed to be AS RESILIENT AS AIR
It is guaranteed to RETURN TO ITS ORIGINAL SIZE, NEVER TO SHRINK, AND ALWAYS TO GIVE PERFECT SATISFACTION THROUGH YEARS OF SERVICE.

VISITOR FALLS AT FIRST DITCH

No Injury Done, and Riders Follow Hounds Over Short But Sporty Course.

Under perfect weather conditions and everything ready for a fast and exciting run, the Deep Run hounds held the last meet yesterday for the year 1912. The run was not as long as usual, many of the riders desiring to return to the city earlier than heretofore in order to fill social engagements. The meet was at the Belt Line bridge, on the Broad Street Road, to Patterson Avenue, to the Cherry Street overcast bridge, through Sunnyside and Williams, back to the Cary Street Road, then through Beattie and Adams to the Country Club, about four miles.

Benjamin M. Wells, of England, who is spending a few days in the city, was a guest of the hunt club, and "came a cropper" at the first ditch. Miss Frederica Campbell showed herself an excellent horsewoman in taking a wire fence in Sunnyside. Those riding were: B. B. Harris, on Leeburg Boy; Mr. Kelly on Gray Boy; Huntsman Thornton on Gates; W. O. Young, M. E. H. on Overland; H. C. Scott on Nicky-Time; Miss Frederica Campbell on Lady; Miss Fannie Crenshaw on Westchester; E. R. Snyder on Her Grace; James A. Graves on High Spirit; B. M. Wells on Pauline; J. A. White, Jr. on Iron Prince; and W. B. Snyder on Baby.

Gamboling on the Green

January and February of the New Year should be interesting months for the billiard fans throughout the United States. The first of the championship matches will be that at Pittsburgh on the night of January 18 for the B.I. emblem between Ora Morningstar, the champion at this open game, and George Sutton, of Chicago, challenger and former holder of the title.

Win or lose in the money city, Sutton, striving to retrieve his lost laurels, will return to Chicago and making new chalk lines on his private table, will get down to preparatory work for his championship match at Hotel Astor on the night of February 2. This match, also of 500 points, will be for the B.I. crown which adorns the head of the affable young New York wizard who successfully defended his title in the recent New York tournament and who will be a big favorite when he faces his old rival, Sutton.

Sutton, by the way, may prove a worthy foe of both Morningstar and Hopper. George still is smarting under the defeat sustained by Ora when the latter lifted from him the B.I. emblem at Chicago last spring, and he is determined to turn the tables on his conqueror. To accomplish this end, Sutton has completely changed his methods of practice, and instead of playing alone, the black ball against the white, as is his wont, he has arranged a real match of 100 points with George Hopper. They will play the points each afternoon and evening, the match opening to-morrow afternoon. All the games will be played in Sutton's room.

Sutton is in good health and of late he has been in excellent stroke. Years ago he beat Hopper in a New York tournament with an average of 100 out for 500 points. That record performance established a world's record.

that still stands, the nearest approach to it being Hopper's recent century average at Philadelphia in a 40-point game with George F. Simon, of New York. Sutton actually feels that he has "come back" to his old form, and if he beats Hopper in their 400-point match, the party expert will journey to Pittsburgh confident of taking Morningstar into camp.

Chicago and St. Louis are awaiting the coming of Koji Yamada, the Japanese sensation. He and Hopper will play a 200-point match at 100 in each of the Wickers cities, opening at Hopper's in Chicago on January 8, and later taking in the Mount city, playing at Peterson's room.

Yamada's style is as unique as it is wonderful, and though the little brown man has but less than four years' experience with the cue, and that in a foreign land where good players and tutors are less plentiful than in America, he uses both hands with equal ability and can outmaneuver the best players in the world.

The Japanese are great students. Each day Koji is learning something from Hopper. He has learned to play from Hopper, Sutton and others as well, and when he has been at it another year and a half many good judges will miss their guess if he does not outstrip all the world's masters. He is not yet twenty-four years old, and may not reach the limit of his splendid skill until he is thirty.

And while the West is looking forward to the visit of Yamada and the marvelous record of Hopper, the East is looking forward to the coming of the twenty-four year old, and may not reach the limit of his splendid skill until he is thirty.

Two Bidders for Fame

Yamada and Hopper are the two bidders for fame, who will be in great demand at the Wickers match at the Auditorium New Year's night.

Down the Alleys

Interest and stimulate the bowling game, not only in Richmond, but in the other two cities.

Bowling, as conducted on the alleys in Richmond, is one of the high-toned games, and the good derived from the exercise cannot be overestimated. Many men closely confined to offices and high desks during the long hours of the day find in bowling a means of giving exercise to every muscle in the body, which means resultant good health.

Bowlers in Washington and Baltimore are deeply interested in the proposed series, and already there is great eagerness manifested by the bowlers in the three cities to make the team which will visit the other cities. It is believed that such a series will be the means of bringing out many unheard-of "stars." Naturally all the bowlers want to represent their cities in the main games, and the games to be played to select these players will be close and interesting in the greatest degree.

For the purpose of forming a Richmond Athletic Association to develop field and track athletics, a meeting of representatives of every athletic organization in Richmond will be held early in January. In order to know at once how many school boys, working boys and young men will be interested in taking part in a big indoor meet to be held some time in February, the following information is desired:

Name _____
Age _____
Occupation _____
Place of business _____
To what athletic organization do you belong? _____
What school do you attend? _____

(Mark with an X the events you would like to enter.)

Seventy-five-yard dash _____ Running high jump _____
Running broad jump _____ Half-mile run _____
Quarter-mile hurdle _____ Mile run _____
Twelve-pound shot put _____ Five-mile run _____
Half-mile relay for clubs, churches, schools and colleges, each man to run one-eighth of a mile.
Fill out the above and mail at once to FRANK B. TOLSEY, Church Civic Association, Church Hill, Richmond, Va.

Or to SPORTING EDITOR, The Times-Dispatch, Richmond, Va.
(There will be no expense for those taking part.)

Hard Schedule for Howitzers

On account of the Christmas holidays the Howitzer basketball team did not get in any practice this week, but after the new year the men will get in hard training for several big games to come early in January. On next Saturday night the first team will clash with the West End Association, while the Howitzers will again meet the C. C. A. No admission fee will be charged, friends of the organization being cordially invited.

The January schedule follows: January 4, West End Association at Richmond; January 11, Williams and Mary College at Williamsburg; January 18, Fredericksburg College at Richmond; January 25, open.

A number of the Howitzers will join the proposed Richmond Athletic Association in the events to be pulled off.

Football Game Ends in a Row

Having finished the football game between the teams of Florida University and the State Athletic Union, the first quarter is a draw. The Florida players recognized that the Cuban period of the game was the end of the line.

A game of football was suspended around the stadium and the crowd of the Florida University. The game was taken into custody by the police in the charge of the State Athletic Union. The game was suspended at a point in which game money was being changed.

It is reported that the game was suspended at a point in which game money was being changed.

Bowlers Will Hold Conference

Meeting This Week to Discuss Plans for Intercity Series of Games.

Manager Jake Rouss, of the Palace Bowling Alleys, and Manager Blair, of the Newport Bowling Alleys, of this city, will go to Washington this week to confer with the managers of the alleys in that city in reference to the proposed intercity bowling association, which will bring together in Washington, Richmond and Baltimore the best bowlers of the three cities in a series of games.

The details of the series will most likely be worked out at the conference this week, and local bowlers are much interested in the outcome of the meeting. For all bowlers realize that such a series of games would awaken new

BOTH FOR \$5.00

"KELLY QUALITY"

EXPRESS PREPAID

This Double Package—one gallon very choice old 100 proof Southern Distilled Corn Whiskey and one gallon choice old 100 proof Kentucky Sour Mash Whiskey, sent to you, charges prepaid, upon receipt of your remittance, \$5.00. Single gallon either, prepaid, \$3.00.

This is not a short-time proposition, but is made to be permanent—we simply want your first order and we know your subsequent orders will come our way. If not by far the BEST VALUE ever received by you, simply close the package and return to us, express collect, and we will return your money without question.

Their fine quality is due to the fact that the goods were distilled in the old-fashioned way, from the choicest of grain, and have been stored for years in Uncle Sam's Warehouses in new charred oak barrels.

The Glass Jug constitutes the safest, cleanest and most up-to-date liquor receptacle. You can't LOSE—we make Loss or Breakage good. Send order and remittance to-day. Immediate shipment. Write for "KELLY QUALITY" price list complete.
